

# Outlook Integration to 8x8 Virtual Office Desktop

Last Modified on 03/25/2019 2:49 pm EDT

Virtual Office Desktop can be linked to Microsoft Outlook in order to:

- Synchronize Outlook Contacts into 8x8 Virtual Office
- Create 8x8 meetings in Outlook
- Make phone numbers in Outlook clickable to call through 8x8 extension

These plugins for Outlook require local administrator rights for your computer. Make sure you have a local administrator account to run this installation.

Get the Outlook Plugin for Microsoft Office and Virtual Meetings.
